

ROS2 Cheats

Linux

- `STRG` + `ALT` + `T`
neues Terminal
- `Tab` `Tab`
automatische Vervollständigung
- `ls`
zeigt Inhalt des aktuellen Ordners
- `cd <ordner>`
Verzeichnis ändern
- `cd ..`
Einen Ordner zurück
- `clear`
säubert das Terminal
- `code .`
öffnet VSCode im aktuellen Verzeichnis

Igus Rebel

- `igus`
aktiviert Igus Workspace

Simulation:

- `ros2 launch igus_rebel_moveit_config igus_rebel_simulated.launch.py`
startet Gazebo und RViz mit Igus Rebel

echter Roboter:

- `ros2 launch igus_rebel rebel.launch.py`
Interface für Verbindung mit Roboter
- `ros2 launch igus_rebel_moveit_config igus_rebel_motion_planner.py use_gui:=true`
startet MotionPlanner und RViz
- `ros2 run igus_student student_control`
führt student_control.py aus

Basic Commands

- `ros2 node list`
- `ros2 node info <node-name>`
- `ros2 topic list`
- `ros2 topic echo <topic-name>`
- `ros2 service list`

Publishing

- `ros2 topic pub /topic std_msgs/String "data: hello"`

Packages

- `ros2 pkg list`

Workspaces

- `mkdir -p <name>_ws/src`
- `colcon build`
- `source install/setup.bash`

Launch Files

- `ros2 launch <paket-name> <file>.launch.py`

Parameters

- `ros2 param list`
- `ros2 param get <node> <param>`
- `ros2 param set <node> <param> <value>`

Nodes

- `ros2 run <paket-name> <node-name>`
- `ros2 node info <node-name>`

Services

- `ros2 service call /srv_name srv_type {...}`

Interfaces

- `ros2 interface list`
- `ros2 interface show <msg>`
